RE: 2019 Southern Straits ORC Wind Strength Determination

The Race Committee has evaluated the actual recorded wind speed range across the Long and Medium Courses based on the observed wind speeds at wind stations in proximity to the transits of the first-to-finish Boats.

Medium Course ORC Courtesy wind speed remains at MEDIUM RANGE (11kt)

Long Course ORC wind speed is adjusted to HIGH RANGE (14kt)

2019 Southern Straits Classic NOR 11.2

“Scoring for boats racing under an ORC Club or ORCi Certificate will be calculated by Time on Time using the Coastal Triple Number scoring coefficient for one of the following three speed ranges:

Low Range (9 knots or less)

Medium Range (between 8 and 14 knots)

High Range (equal to or greater than 14 knots)

At the Skippers' Meeting the race committee will advise of the Declared Wind Speed Range that it plans to use for Long Course and also courtesy scored courses, if required.

The race committee may change the wind speed range if the actual recorded speed range is different than the Declared Wind Speed Range for more than 50% of the time it takes the first-to-finish boat to transit the course. Any adjustments to the wind speed range will be based on the average hourly winds observed at wind stations and adjusted to the 10m datum.”
